

Attachment I – RAPPs Preprint Question 42 Table 7

42. To obtain written approval of this payment arrangement, a State must demonstrate that each state directed payment arrangement expects to advance at least one of the goals and objectives in the quality strategy. In the Table 7 below, identify the goal(s) and objective(s), as they appear in the Quality Strategy (include page numbers), this payment arrangement is expected to advance. If additional rows are required, please attach.

Table 7: Payment Arrangement Quality Strategy Goals and Objectives

Goal(s)	Objective(s)	Quality strategy page
a. Promoting optimal health for Texans at every stage of life through prevention and by engaging individuals, families, communities, and the healthcare system to address root causes of poor health.	<p>Improve the percentage of Medicaid Managed Care beneficiaries that are offered an influenza immunization when seeking care at Rural Health Clinics.</p> <p>Improve the percentage of Medicaid Managed Care beneficiaries with diabetes that have recommended HbA1c screenings when seeking care at Rural Health Clinics.</p> <p>Individuals access routine and timely preventative and primary care.</p>	1 4
b. Providing the right care in the right place at the right time to ensure people can easily navigate the health system to receive timely services in the least intensive or restrictive setting appropriate.	<p>Maintain or increase the capacity of Rural Health Clinics to provide virtual appointments.</p> <p>Reduce unnecessary hospital admissions and emergency department visits for adults and children receiving preventive care services through rural health clinics.</p> <p>Increase patient satisfaction with access to care.</p>	4

Attachment I – RAPPS Preprint Question 42 Table 7
