

**TEXAS HEALTH AND HUMAN SERVICES  
COMMISSION  
RATE ANALYSIS DEPARTMENT**

**Proposed Medicaid Payment Rate for Incontinence  
Supplies**

**Payment rates are proposed to be effective January 1, 2012**

## SUMMARY OF PROPOSED MEDICAID PAYMENT RATE

**Effective January 1, 2012**

Included in this document is information relating to the proposed Medicaid payment rate for the Incontinence Supplies update that is proposed to be effective January 1, 2012.

The Health and Human Services Commission (HHSC) is responsible for the reimbursement determination functions for the Texas Medicaid Program. Within available funding, proposed rates are calculated utilizing established methodologies that conform to the Social Security Act and related federal regulations, the federally approved Texas Medicaid State Plan, all applicable state statutes and rules, and other requirements. Most of the requirements that apply to Fee-for-Service Medicaid are summarized below:

- Procedure codes and descriptions used in the Texas Medicaid Program are national standard code sets as required by federal laws. The Healthcare Common Procedural Coding System (HCPCS) is divided into two principal subsystems, referred to as level I and level II of the HCPCS. Level I of the HCPCS is comprised of CPT (Current Procedural Terminology), a numeric coding system maintained by the American Medical Association (AMA). The CPT is a uniform coding system consisting of descriptive terms and identifying codes that are used primarily to identify medical services and procedures furnished by physicians and other health care professionals. Level II of the HCPCS is a standardized coding system that is used primarily to identify products, supplies, and services not included in the CPT codes, such as ambulance services and durable medical equipment, prosthetics, orthotics, and supplies (DMEPOS) when used outside a physician's office. Level II codes are also referred to as alpha-numeric codes because they consist of a single alphabetical letter followed by four numeric digits, while CPT codes are identified using five numeric digits. More explanation is at <https://www.cms.gov/MedHCPCSGenInfo/>.
- Resource-based fee (RBF) methodology uses relative value units (RVUs) established by Medicare times a conversion factor. Current conversion factors include \$28.640 for most services provided to children 20 years of age and younger and \$27.276 for services provided to adults 21 years of age and older. Fees for services provided to children and identified as having access-to-care issues may be assigned a higher conversion factor, currently \$30.00.
- Access-based fees (ABFs) allow the state to reimburse for procedure codes not covered by Medicare or for which the Medicare fee is inadequate, or account for particularly difficult procedures, or encourage provider participation to ensure access to care.

- Manual pricing is used for any procedure code when a wide range of products or services are covered by a procedure code with a wide range of costs. Manual pricing is always used for miscellaneous procedure codes, which are established to allow payment for necessary services or products that are not adequately described by any other procedure code.
- For Durable Medical Equipment, Prosthetics, Orthotics and Supplies (DMEPOS), participating providers are reimbursed the lesser of the billed amount or the Medicaid reimbursement rate. The Medicaid reimbursement rate is usually a percentage of the Medicare reimbursement rate for the procedure code on the Medicare fee schedule specific to Texas that is available at the time of the review unless that rate is insufficient for the items covered under the procedure code that are required by the Texas Medicaid population.
- For services and items that are not covered by Medicare or for which the Medicare rate is insufficient, different approaches are used to develop fees based on available information. These alternate methods include, as applicable:
  - The median or mean of the Medicaid fees from 14 states (the 10 most populous and the 4 bordering Texas) or the median or mean of the states that cover the service.
  - Physician-administered drugs are reimbursed at 85 percent of the average wholesale price (AWP) for drugs and biologicals over 12 months old. Drugs and biologicals that are 12 months old and under, vaccines and infused drugs are reimbursed at 89.5 percent of AWP.
  - Regional Medicare pricing from Trailblazer.
  - The current Medicaid fee for a similar service (comparable code).
  - The most recent *HCPCS Fee Analyzer* or the (CPT) *Customized Fee Analyzer*, customized listings of the 25<sup>th</sup>, 50<sup>th</sup>, 75<sup>th</sup>, and 85<sup>th</sup> percentiles of reimbursement rates charged for each of the procedures in the Healthcare Common Procedure Coding System (HCPCS) and the Current Procedural Terminology (CPT), respectively, in the Dallas area.
  - Most recent American Dental Association *Survey of Dental Fees* for the West South Central region (which includes Texas).
  - 82 percent of the manufacturer suggested retail price (MSRP) supplied by provider associations or manufacturers except for enteral and parenteral products which are 89.5 percent of AWP.
  - Cost shown on a manufacturer's invoice submitted by the provider to HHSC.

The specific administrative rules that govern the establishment of the fees in this proposal include these rules in Title 1 of the Texas Administrative Code (1 TAC):

- §355.8021, which addresses the reimbursement methodology for durable medical equipment and expendable supplies in home health services; and

- §355.8441, which addresses the reimbursement methodology for durable medical equipment and expendable supplies in Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Program (known in Texas as Texas Health Steps).

The reimbursement rates proposed reflect applicable reductions directed by the 2012-2013 General Appropriations Act, H.B. 1, 82nd Legislature, Regular Session. Detailed information related to specifics of the reductions can be found on the Medicaid fee schedules.

HHSC will conduct a public hearing to receive comments regarding the proposed Medicaid payment rates on November 16, 2011, at 1:30 p.m. in the Lone Star Conference Room in Building H of the Braker Center, at 11209 Metric Boulevard, Austin, TX 78758-4021, with entrance through Security at the front of the building facing Metric Boulevard. HHSC will consider concerns expressed at the hearing prior to final rate approval. This public hearing is held in compliance with the provisions of Human Resources Code §32.0282 and 1 TAC §355.105(g), which require a public hearing on proposed payment rates.
