Background

HHSC is responsible for the reimbursement determination functions for the Texas Medicaid Program. Rates are calculated utilizing established methodologies that conform to the Social Security Act and related federal regulations, the federally approved Texas Medicaid State Plan, all applicable state statutes and rules, and other requirements. HHSC reviews the Medicaid reimbursement rates for all acute care services every two years. These biennial reviews result in rates that are increased, decreased, or remain the same. The reviews are conducted to ensure that rates continue to be based on established rate methodologies.

Methodology

The specific administrative rules that govern the establishment of the fees in this proposal include these rules in Title 1 of the Texas Administrative Code:

- §355.8085, which addresses the reimbursement methodology for

- physicians and other practitioners;
- §355.8441, which addresses the reimbursement methodologies for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) services (known in Texas as Texas Health Steps); and

Proposed Rate Adjustments

A summary of the methodologies used to determine the fee-for-service Medicaid rates is listed below:

- Procedure codes and descriptions used in the Texas Medicaid Program are national standard code sets as required by federal laws; Healthcare Common Procedural Coding System (HCPCS) and Current Procedural Terminology (CPT).
- A review of the Medicare rate for the same or similar services.

Specific payment rate adjustments are listed in the attachments outlined below:
