## I. Introduction

Rudd and Wisdom, Inc. has been retained by the Texas Health and Human Services Commission (HHSC) to develop the state fiscal year 2015 (FY2015, September 1, 2014 through August 31, 2015) premium rates for HMOs participating in the Texas Medicaid STAR+PLUS program. Effective March 1, 2015 the STAR+PLUS program will be expanded to include STAR+PLUS eligible members residing in a nursing facility. This report presents the rating methodology and assumptions used in developing the premium rates for this programmatic expansion.

STAR+PLUS is a Texas Medicaid managed care program for people who have disabilities or are age 65 or older. STAR+PLUS participants get Medicaid health-care and long-term services and support through a medical plan that they choose. Prior to March 1, 2015 nursing facility residents and their expenses were carved out from STAR+PLUS and paid on a fee-for-service (FFS) basis. In addition, STAR+PLUS members who enter a nursing facility are disenrolled from STAR+PLUS after residing in a nursing facility for four months. Effective March 1, 2015 these nursing facility services and members will be carved into the STAR+PLUS program.

Rudd and Wisdom has provided actuarial services to the Texas Medicaid program for over 25 years. We have participated in the state's managed care rating process since its inception in 1993. This year, as in previous years, we have worked closely with HHSC in developing the FY2015 HMO premium rates.

Rudd and Wisdom has relied on the following data sources::

- Monthly enrollment for all Medicaid members residing in a nursing facility during the period September 2012 through June 2014. This enrollment data included detailed information including dates of nursing facility residence, age, service delivery area, Medicare status and service codes. This information was provided by HHSC.
- Acute care fee-for-service claims data. Data was collected separately for inpatient and all other acute care services for the period September 2012 through June 2014. These reports were developed by HHSC using the detailed enrollment list described above and querying all fee-for-service acute care claims incurred by these nursing facility individuals during their applicable eligibility period. Only those services which are the financial responsibility of the health plan were included in the capitation rates.
- Nursing facility claims data for the period September 2008 through June 2014. This data was provided by the Texas Department of Aging and Disability Services (DADS), the department within HHSC that currently oversees the nursing facility program. This data was provided in multiple formats including the following:
  - Data was collected separately by month, county and type of service. This aggregated data served as the base period claims data used for the rate development.
  - Data was provided separately by nursing facility and type of service. This data was used to identify facilities which will be excluded from the nursing facility carve-in.

- Data was provided for Daily Care separated by nursing facility and recipient Resource Utilization Group (RUG) score. This data was used to identify the varying levels of acuity of the nursing facility members. Daily Care is the most prevalent nursing facility service and represents over 95% of all nursing facility expenditures.
- Information provided by HHSC regarding nursing facility claim recoupments for the period September 2010 through August 2012.
- Information from HHSC regarding recent changes in covered services and provider reimbursement under the nursing facility program.
- Information provided by HHSC regarding FY2013 acute care claims for STAR+PLUS members residing in a nursing facility during their first four months of residency. This information was obtained from the managed care encounter database.
- Information provided by HHSC regarding proposed FY2015 Medicaid provider reimbursement rates.
- Information provided by HHSC regarding the enhanced payment level for nursing facilities eligible for the Minimum Payments for Qualified Nursing Facilities program.

After accumulating all of the information to be used in the rate setting process, a comparison of the various sources of claims data was performed to check for consistency. We compared (i) the claims data by service delivery area, (ii) the claim amounts reported by provider and type of service and (iii) the claim amounts by RUG score. There was satisfactory consistency between the three primary claims data sources. Overlapping data was provided by multiple sources (HHSC and DADS) in order to confirm the accuracy of the data being used. Although the above data was reviewed for reasonableness and consistency Rudd and Wisdom did not audit the data.

The analysis of base period claims data for each service area attempted to identify and adjust for any distortions in the data. Significant variations in experience, including the impact from unusually large individual claims, were investigated however no adjustment to the data has been deemed to be necessary. Attachment 2 presents a summary of the base period claims data by service area, risk group and type of service.

Effective March 1, 2015 the participating managed care plans will be required to submit detailed encounter data supporting the claims paid for their membership. Once available this data will serve as the primary source of data for future rate setting.

## II. Overview of the Rate Setting Methodology

The actuarial model used to derive the FY2015 STAR+PLUS Nursing Facility HMO premium rates relies primarily on fee-for-service claims data. The historical claims experience for each area was analyzed and estimates for the base period (May 2013 through April 2014) were developed. These estimates were then projected forward to the rating period March 1, 2015 through August 31, 2015 using assumed trend rates. Other plan expenditures such as service coordination and administrative expenses were added to the claims component in order to project the total cost under the STAR+PLUS Nursing Facility program. These projected total cost rates were determined separately for each risk group to develop a set of community rates for each service area.

The managed care service areas used in the analysis were as follows:

- Bexar County Service Area (San Antonio)
- Dallas County Service Area (Dallas)
- El Paso County Service Area (El Paso)
- Harris County Service Area (Houston)
- Hidalgo County Service Area (Hidalgo)
- Jefferson County Service Area (Beaumont)
- Lubbock County Service Area (Lubbock)
- Nueces County Service Area (Corpus Christi)
- Tarrant County Service Area (Fort Worth)
- Travis County Service Area (Austin)
- Central Medicaid Rural Service Area (MRSA Central)
- Northeast Medicaid Rural Service Area (MRSA Northeast)
- West Medicaid Rural Service Area (MRSA West)

The risk groups (or rating populations) used in the analysis are as follows:

- Medicaid Only – Nursing Facility
- Dual Eligible – Nursing Facility

The services used in the analysis include the following:

### Acute Care Services

- Ambulance Services
- Audiology Services
- Behavioral Health Services
- Birthing Center Services
- Chiropractic Services
- Dialysis
- Durable Medical Equipment and Supplies
- Emergency Services
- Family Planning Services
- Home Health Services
- Hospital Services - outpatient
- Lab, X-ray and Radiology Services
- Medical Check-ups and CCP Services for children under age 21

- Optometry
- Podiatry
- Prenatal Care
- Primary Care Services
- Specialty Physician Services
- Therapies – physical, occupational and speech
- Transplantation of Organs and Tissues
- Vision
- Inpatient Facility Services
- Prescription Drugs

Nursing Facility Services

- Daily Care – including room and board and nursing services
- Customized Power Wheelchairs
- Ventilators
- Adaptive Aids
- Medical Supplies
- Therapies – physical, occupational and speech

Services specifically excluded from the analysis include:

- Dental and Orthodontia Services

Further information regarding the carve-in of prescription drugs into the STAR+PLUS Nursing Facility program State Of Texas Medicaid Managed Care Rate Setting Pharmacy Carve-In For Nursing Facility Clients State Fiscal Year 2015.

HHSC utilizes a community rating methodology in setting the STAR+PLUS Nursing Facility base premium rates. The base rates vary by service area and risk group but are the same for each HMO in a service area. Attachment 3 presents the summary community rating exhibit for each service area along with a description of the analysis.

### **III. Adjustment Factors**

This section contains a description of the adjustment factors used in the FY2015 STAR+PLUS Nursing Facility rate setting process.

#### ***Trend Factors***

The rating methodology uses assumed trend factors to adjust the base period claims cost to the projection period. The cost trend factors used in this analysis are a combination of utilization and inflation components. Separate trend factors were developed by type of service – acute care and nursing facility services.

The projected acute trend rate assumptions were developed by the actuary based on an analysis of recent experience under the existing STAR+PLUS HMO plans. A detailed description of the development of these trend assumptions can be found in Attachment 5 of the report titled “State Of Texas Medicaid Managed Care STAR+PLUS Program Rate Setting State Fiscal Year 2015”. The trend assumptions are the average of the FY2015 OCC and HCBS trends described in this report. A single trend assumption applies to all service areas but varies by type of service (non inpatient and inpatient).

The projected nursing facility trend rate assumption was developed by the actuary based on an analysis of historical fee-for-service nursing facility claims for the period September 2008 through June 2014. Based on this information, estimates of monthly incurred claims were made through April 2014. The claims cost and trend experience were reviewed separately by service area. These service area trends were then combined into a statewide average using a weighted average formula with enrollment as the weights. The annual trends were adjusted to remove the impact of provider reimbursement increases and decreases that have impacted the nursing facility cost during this period. The final trend assumption was then selected as the average trend during FY2012 (1/3 weight), FY2013 (1/3 weight) and FY2014 (1/3 weight). The FY2014 trend is assumed to be the average trend during the first eight months of the fiscal year.

Attachment 4 is a summary of the cost trend analysis for nursing facility services. The chart below presents the assumed annual trend rates by type of service.

Acute Care (non-inpatient)	2.4%
Acute Care (inpatient)	2.9%
Nursing Facility	3.1%

#### ***Provider Reimbursement Adjustments – Nursing Facility***

Medicaid provider reimbursement changes were provided for all nursing facility services on September 1, 2013 (2%) and again on September 1, 2014 (3.9%). Exhibit A of Attachment 5 presents a summary of the derivation of these adjustment factors.

#### ***Excluded Facilities***

Several nursing facilities and residents will be excluded from the managed care expansion. These facilities and their residents include the Truman Smith Children’s Care Center

located in Gladewater and the Veterans Land Board (VLB) Texas State Veterans Homes located in Amarillo, Big Spring, Bonham, El Paso, Floresville, McAllen, Temple and Tyler. Exhibits B and C of Attachment 5 present a summary of these adjustment factors.

### ***Nursing Facility Recoupments***

Under managed care the HMOs will be responsible for recouping funds from the nursing facilities for claims deemed to have been paid at the incorrect level. Under the current fee-for-service model these recoupments occur on a delayed basis well after the end of the fiscal year. The base period used in developing the premium rates does not yet include these recoupments and therefore requires further adjustment. Exhibit D of Attachment 5 presents a summary of this adjustment.

### ***Seasonality Adjustment***

The base period used in calculating the premium rates for all service areas includes claims for the twelve month period May 2013 through April 2014; however, the calculated premium rates will be effective for the six month period March 2015 through August 2015. Due to rating period being six months, the impact of seasonal difference in cost of care was studied. Based on this analysis it was determined that an adjustment for seasonality is not necessary for acute care services but is necessary for nursing facility services. Exhibit E of Attachment 5 presents a summary of these adjustments.

### ***Minimum Payment for Qualified Nursing Facility Adjustment***

Effective March 1, 2015, HHSC will establish minimum payment levels for certain non-state government owned nursing facilities. For those facilities approved by the state, the participating HMOs will be required to reimburse these facilities at or above the Medicare payment level. The impact of this increased reimbursement has been analyzed and a derivation of the adjustment factors is included in Attachment 6

### ***Provider Reimbursement Adjustments – Acute Care***

Medicaid provider reimbursement changes have been implemented for the following services: APR DRG implementation, Potentially Preventable Complication reimbursement reductions, 10% reimbursement reduction for inpatient outlier reimbursement, revisions to the therapy fee schedule, outpatient facility reimbursement reductions, outpatient imaging reimbursement reductions, ambulance reimbursement reductions, revisions to emergency room reimbursement provisions for non emergent services and reduction of Medicaid reimbursement in excess of Medicare.

The rating adjustments for these provider reimbursement changes were calculated based on the rating adjustments determined for the existing STAR+PLUS managed care populations in each service area. The derivation of these adjustment factors is described in detail in the report titled “State Of Texas Medicaid Managed Care STAR+PLUS Program Rate Setting State Fiscal Year 2015”. All adjustments were calculated by applying actual health plan encounter data to the old and new reimbursement basis and the resulting impact determined. Attachment 7 presents a summary of the derivation of these adjustment factors and separates the impact into non-inpatient and inpatient.

### ***Managed Care Data Completion Adjustment***

The May 2013 through April 2014 base period data is made up of all fee-for-service claims paid for Medicaid members residing in a nursing facility. Some of these nursing facility residents were enrolled in the STAR+PLUS managed care program for the first four months of their nursing facility residency. The acute care claims of these managed care members are currently the responsibility of the STAR+PLUS HMO in which they are enrolled and therefore not included in our fee-for-service data. A data source that separately identifies these managed care claims during the base period is not yet available so adjustment factors have been developed to gross up the fee-for-service data to be inclusive of the expected managed care claims. Attachment 8 presents a summary of the derivation of these adjustment factors.

### ***Managed Care Efficiency***

Our rating analysis includes an explicit assumption regarding the anticipated reduction in claims cost resulting from the implementation of managed care. In deriving the managed care efficiency factor, we relied upon experience from previous STAR+PLUS expansions. The following table includes the managed care savings assumptions by type of service:

Acute Care (non-inpatient)	2.8%
Acute Care (inpatient)	14.3%
Nursing Facility	0.0%

The savings assumptions take into consideration that some of the acute care claims are currently delivered under the STAR+PLUS managed care program. For these acute care claims no further managed care savings are assumed.

No managed care savings are assumed for nursing facility services because the HMOs are required to contract with all nursing facilities at a reimbursement level that is at least equal to the current Medicaid fee-for-service reimbursement.

Attachment 9 provides additional information regarding the derivation of these adjustment factors

### ***Service Coordination***

The HMOs will be required to utilize service coordinators to conduct face-to-face meetings with their members residing in nursing facilities. The service coordinators will partner with nursing facility care coordinators and other nursing facility staff to ensure members' care is holistically integrated and coordinated and find ways to avoid preventable hospital admissions, readmissions, and emergency room visits, resulting in shared savings to benefit both the nursing facilities and HMOs, and most importantly the members themselves. The average service coordination expense of \$14.30 per member per month for the existing STAR+PLUS health plans and populations has been included in the nursing facility rate development.

## **IV. Administrative Fees and Risk Margin**

The rating methodology includes an explicit provision for administrative services. The amount allocated for administrative expenses is \$133.00 pppm. This amount is intended to provide for all administrative-related services performed by the HMO.

The administrative fee amounts were determined based on a review of the administrative fee provision included in the current STAR+PLUS capitation rates for the HCBS populations. The HCBS population includes individuals who meet the institutional level of care criteria but are residing in a community setting rather than a nursing facility. This population most closely resembles the nursing facility population and the administrative burden that the HMOs will encounter.

The premium rates also include an amount for premium tax (1.75% of premium), maintenance tax (\$0.065 pppm) and a risk margin (2.0% of premium).

## V. Summary

The chart below presents the results of the FY2015 STAR+PLUS Nursing Facility rating analysis and includes all components of the premium – acute care non-inpatient, acute care inpatient, nursing facility and prescription drugs. This report details the development of the acute care (non-inpatient and inpatient) and nursing facility components of the premium. Further information regarding the prescription drug component of the premium rate can be found in the report titled State Of Texas Medicaid Managed Care Rate Setting Pharmacy Carve-In For Nursing Facility Clients State Fiscal Year 2015.

The capitation rates included in this document do not include provision for the Affordable Care Act (ACA) Health Insurance Providers Fee. HHSC will develop and implement a procedure for reimbursing the MCOs for (i) the ACA Health Insurance Providers Fee, (ii) any applicable federal income tax impact resulting from payment of the ACA Health Insurance Providers Fee and (iii) any applicable state premium tax impact resulting from payment of the ACA Health Insurance Providers Fee. Such reimbursement will be provided based on a CMS-approved methodology.

Health Plan	Medicaid Only	Dual Eligible
Monthly Premium Rates		
Bexar	\$7,948.74	\$3,705.67
Dallas	\$7,946.11	\$3,483.45
El Paso	\$8,656.86	\$3,800.79
Harris	\$8,698.11	\$3,667.68
Hidalgo	\$9,623.39	\$4,176.22
Jefferson	\$8,230.65	\$3,487.45
Lubbock	\$8,959.84	\$4,006.18
Nueces	\$9,025.64	\$4,075.49
Tarrant	\$8,591.77	\$3,640.11
Travis	\$8,063.40	\$3,680.51
MRSA Central	\$8,379.57	\$4,152.88
MRSA Northeast	\$8,601.88	\$3,710.90
MRSA West	\$9,013.12	\$4,175.96

## VI. Actuarial Certification of FY2015 STAR+PLUS Nursing Facility HMO Premium Rates

I, Evan L. Dial, am a principal with the firm of Rudd and Wisdom, Inc., Consulting Actuaries (Rudd and Wisdom). I am a Fellow of the Society of Actuaries and a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering this opinion.

Rudd and Wisdom has been retained by the Texas Health and Human Services Commission (HHSC) to assist in the development of their state fiscal year 2015 (FY2015) managed care rate-setting methodology, assumptions and resulting premium rates and to provide the actuarial certification required under Centers for Medicare and Medicaid Services (CMS) requirements 42 CFR 438.6(c).

I certify that the FY2015 HMO premium rates developed by HHSC and Rudd and Wisdom satisfy the following:

- (a) The premium rates have been developed in accordance with generally accepted actuarial principals and practices;
- (b) The premium rates are appropriate for the populations and services covered under the managed care contract; and
- (c) The premium rates are actuarially sound as defined in the regulations.

We have relied on historical experience data and program information provided to us by HHSC. We have reviewed the data for reasonableness but have not audited the data.

Please note that actual health plan contractor experience will differ from these projections. Rudd and Wisdom has developed these rates on behalf of the State to demonstrate compliance with the CMS requirements under 42 CFR 438.6(c). Any health plan contracting with the State should analyze its own projected premium needs before deciding whether to contract with the State.

---

Evan L. Dial, F.S.A., M.A.A.A.

Summary of March 1, 2015 through August 31, 2015 STAR+PLUS Nursing Facility Rating Analysis

The attached exhibit presents summary information regarding the March 1, 2015 through August 31, 2015 rates. Included on the exhibit are the premium rates by component: acute care (non-inpatient), acute care (inpatient), nursing facility, prescription drug and the Minimum Payment for Qualified Nursing Facility add-on. All HMOs participating in a service area will be paid the same rate during the rating period.

## March 1, 2015 - August 31, 2015 STAR+PLUS Nursing Facility Rating Summary

### **Incurred Claims Analysis**

The following exhibits present an analysis of the Fee-for-Service (FFS) incurred claims experience for all service areas by type of service. This information includes all claims incurred during the period September 1, 2012 through April 30, 2014 and paid through August 31, 2014.

The exhibits include the following information: (i) monthly enrollment, (ii) claim amounts incurred in that month and paid through August 31, 2014, (iii) estimated proportion of that month's incurred claims paid through August 31, 2014 (completion factor), (iv) estimated incurred claims, (v) estimated incurred claims per member per month (pmpm) and (vi) the ratio of this month's incurred claims pmpm to the same statistic from one year ago (trend factor).

### **Attachment 3**

#### **Community Experience Analysis**

The following exhibits present a summary of the experience analysis performed for each managed care service area. HHSC utilizes a community rating methodology in setting the STAR+PLUS premium rates. The community rates vary by risk group and service area but are the same for each HMO in a service area.

Below is a brief description of the exhibits contained in this attachment. The exhibits present the derivation of the March 1, 2015 through August 31, 2015 STAR+PLUS Nursing Facility HMO community rates for the following service areas:

Exhibit A – Bexar Service Area

Exhibit B – Dallas Services Area

Exhibit C – El Paso Services Area

Exhibit D – Harris Service Area

Exhibit E – Hidalgo Service Area

Exhibit F – Jefferson Service Area

Exhibit G – Lubbock Service Area

Exhibit H – Nueces Service Area

Exhibit I – Tarrant Service Area

Exhibit J – Travis Service Area

Exhibit K – MRSA Central Service Area

Exhibit L – MRSA Northeast Service Area

Exhibit M – MRSA West Service Area

The top portion of the exhibit shows summary base period (May 1, 2013 through April 30, 2014) experience for claims paid under the Fee-For-Service program. The base period experience is provided separately for acute care and nursing facility care services. This data includes all claims paid for members residing in a nursing facility during this time period with the exception of the acute care claims for STAR+PLUS members as discussed in Attachment 7.

Projected March 1, 2015 through August 31, 2015 incurred claims are developed separately for acute care and nursing facility care based on the adjustment factors discussed throughout the report. Managed care efficiency factors, which vary by type of service, are intended to reflect the anticipated cost difference of transitioning to the STAR+PLUS program.

A provision of \$14.30 pppm for the care coordination services to be provided by the HMOs is included. Additionally, a provision for administrative expenses is included in the amount of \$133.00 pppm. Additional provisions are also included for premium tax (1.75% of premium), maintenance tax (\$0.065 pppm) and risk margin (2.0% of premium).

The bottom of the exhibit shows a summary of the projected March 1, 2015 through August 31, 2015 cost based on these assumptions prior to the inclusion of the Minimum Payment for Qualified Nursing Facilities Add-On. Cost projections are presented separately by type of service. The Minimum Payment for Qualified Nursing Facilities Add-On is presented separately and represents the increased cost associated with the enhanced reimbursement to be paid to eligible facilities. This Add-On includes provision for premium tax.

### Trend Analysis

The rating methodology uses assumed trend factors to adjust the base period claims cost to the projection period. The cost trend factors used in this analysis are a combination of utilization and inflation components. Separate trend factors were developed by type of service – non-inpatient acute care, inpatient care and nursing facility care. The projected acute trend rate assumptions were developed by the actuary based on an analysis of recent experience under the existing STAR+PLUS populations. The nursing facility trend rate assumption was developed based on an analysis of recent fee-for-service claims experience. A single trend assumption applied to all service areas but varies by type of service.

The acute care trend assumptions are the same as those trend assumptions used in the FY2015 STAR+PLUS rate setting project for the existing STAR+PLUS areas and populations. The average FY2015 trend assumption for the OCC and HCBS risk groups was combined to develop a single trend assumption. This assumption varies between non-inpatient and inpatient services. Additional information regarding the assumed acute care trends is available from the report titled “State of Texas Medicaid Managed Care STAR+PLUS Program Rate Setting State Fiscal Year 2015”.

The nursing facility care trend assumption was developed from an analysis of nursing facility claims currently paid by the fee-for-service program. Nursing facility claims were reviewed for claims incurred during the period September 1, 2010 through April 30, 2014 and paid through August 31, 2014. Trends for FY2011, FY2012, FY2013 and FY2014 were developed based on a comparison of the average nursing facility claims per member per month incurred during each fiscal year. The FY2014 trend was estimated as the average trend during the first eight months of the fiscal year compared to the same time period in the prior fiscal year. The impact of provider reimbursement changes were accounted for and removed from the trend analysis. The attached exhibit provides a summary of the average adjusted trends net of reimbursement changes by service area during these four fiscal years. The nursing facility trend assumption is defined as the average trend during the most recent three fiscal years, with equal weighting applied to each.

The chart below presents the assumed annual trend rates.

## **Attachment 5**

### Nursing Facility Provider Reimbursement and Programmatic Revisions Effective During FY2013, FY2014 and FY2015

This attachment presents information regarding rating adjustments for the various provider reimbursement and programmatic revisions that became effective (or will become effective) after the beginning of the base period used in rate setting (May 1, 2013 through April 30, 2014) and before the end of FY2015.

Effective September 1, 2013 HHSC implemented a 2% reimbursement increase for all nursing facilities. Effective September 1, 2014 HHSC implemented an additional increase such that nursing facility reimbursement was 6% greater than the reimbursement effective prior to the initial increase on September 1, 2013. This reimbursement change on September 1, 2014 equaled 3.92% (1.06 divided by 1.02). These increases were applied across the board and did not vary by service or resource utilization group (RUG). Exhibit A presents a summary of the derivation of the rating adjustment factors. The adjustments were calculated by increasing base period nursing facility claims from the period May 1, 2013 through August 31, 2013 by 6% and claims from the period September 1, 2013 through April 31, 2014 by 3.92%.

Several nursing facilities and their residents will be excluded from the managed care expansion. Individuals residing in a State Veterans Home or the Truman Smith Children's Care Center, who are determined eligible for Medicaid, and who meet STAR+PLUS criteria will be excluded. Exhibits B and C present a summary of the derivation of the rating adjustment factors for these exclusions. The adjustment factors were calculated by comparing the service area average nursing facility cost per member per month (pmpm) including all residents and the pmpm excluding those residents in these facilities.

Currently, all nursing facility claims are reviewed to ensure reimbursement was made for each individual associated with the correct RUG level. Any claim found to be paid at the incorrect level is recouped and returned to HHSC. This recoupment process lags well behind the initial claim payment process and does not occur until the completion of each fiscal year. Since this process has not yet occurred for our base period claims, the data used in our rate development is slightly overstated. In order to correct for this overstatement we have studied historical recoupment patterns and have applied the necessary adjustment factors to account for claims yet to be recouped. Exhibit D presents a summary of this rating adjustment factor.

Nursing facility claims fluctuate on a seasonal pattern largely due to the per diem reimbursement structure. Because the rating period is only a six month period and our base period claims represent a full twelve months it was necessary to study the seasonal difference in cost between the period March through August in comparison to the entire year. This cost difference was reviewed for FY2013 and the necessary adjustment factors were determined. Exhibit E presents a summary of the derivation of these rating adjustment factors.

**Minimum Payment to Qualified Nursing Facility Reimbursement Adjustments**

Effective March 1, 2015, HHSC will establish a minimum payment level for certain non-state government owned nursing facilities. For those facilities approved by the state, the participating HMOs will be required to reimburse these facilities at or above the Medicare payment level. The impact of this increased reimbursement was calculated by repricing the base period claims data at the enhanced reimbursement level for each eligible nursing facility.

- (2) Equals 5/2013-4/2014 nursing facility claims.
- (3) Equals Reimbursement Increase divided by Total Nursing Facility Claims.

## **Attachment 7**

### **Acute Care Provider Reimbursement and Programmatic Revisions Effective During FY2013, FY2014 and FY2015**

This attachment presents information regarding rating adjustments for the various provider reimbursement and benefit revisions that became effective (or will become effective) after the beginning of the base period used in rate setting (May 1, 2013 through April 30, 2014) and before the end of FY2015.

Effective September 1, 2013, HHSC implemented revisions to the therapy fee schedules. Reimbursement was reduced by 2.5% for Comprehensive Outpatient Rehabilitation Facilities/Outpatient Rehabilitation Facilities (CORFs/ORFs), 4% for independent therapist operating in an office setting, and 1.5% for therapy services provided inside the home.

Effective September 1, 2013 HHSC implemented an outpatient hospital reduction of 5.3%, which excludes clinical lab and outpatient imaging services. This reduction does not apply to children's hospitals, rural hospitals, or state-owned teaching hospitals.

Effective September 1, 2013 HHSC revised the reimbursement for non emergent services provided in an emergency room. These changes will include the following:

- Reimbursement will be restricted when an individual returns to the emergency department within a 36 hour period.
- Reimbursement will be restricted for non-urgent visits in excess of 24 per year.
- Non-urgent visits will be reimbursed using a flat fee.

Effective September 1, 2013 HHSC reduced hospital imaging reimbursement to 125% of the amount reimbursed for imaging performed in a physician's office.

Effective September 1, 2013 HHSC reduced ambulance reimbursement by 5%.

Effective September 1, 2013 HHSC reduced all Medicaid rates that are in excess of Medicare.

Effective September 1, 2012 HHSC implemented the APR-DRG reimbursement system for all hospitals excluding rural, children's and state owned teaching facilities. Effective September 1, 2013 HHSC transitioned all rural and children's facilities to the APR-DRG reimbursement system.

Effective March 1, 2014 HHSC implemented revisions to hospital reimbursement to account for Potentially Preventable Complications (PPC). The reimbursement reductions amount to 2-2.5% depending on a hospital's performance during the evaluation time period.

Effective September 1, 2013 HHSC reduced the outlier portion of facility reimbursement by 10%. Children's hospitals are excluded from this reduction.

The adjustment factors for each of these revisions is based on the adjustment factors derived in the report titled "State Of Texas Medicaid Managed Care STAR+PLUS Program Rate Setting State Fiscal Year 2015" for the HCBS populations. This population most closely resembles the

nursing facility population because all HCBS members must meet an institutional level of care criteria. These adjustment factors were developed by repricing the managed care encounter data during FY2013 using the revised reimbursement structure. Because many of these reimbursement changes were effective September 1, 2013 the base period partially captures these changes and the May 1, 2013 through August 31, 2013 only needed adjustment.

At the bottom of the exhibit, the adjustment factors have been categorized into non-inpatient and inpatient and aggregated for inclusion in the community rating analysis.

## **Attachment 8**

### **Acute Care Data Completion Adjustment**

This attachment presents information regarding the rating adjustment necessary to gross up the base period fee-for-service data to account for managed care members who temporarily reside in a nursing facility.

The enrollment information collected for the base period includes all individuals residing in a nursing facility. All nursing facility claims paid for these individuals were paid by the Fee-For-Service (FFS) program; however, some of the acute care claims were paid by STAR+PLUS managed care plans. A STAR+PLUS member who enters a nursing facility is not disenrolled from managed care until they have resided in the nursing facility for four months. During this first four months of nursing facility residency their acute care claims are paid by the STAR+PLUS HMO. The base period claims used in the rate development do not include these managed care claims and requires adjustment.

The adjustment factor was calculated by reviewing the ratio of acute care managed care claims to acute care fee-for-service claims during the period September 1, 2012 through August 31, 2013 (FY2013), the most recent twelve month period for which managed care data is available. Acute care claims for STAR+PLUS members residing in a nursing facility during their managed care eligibility are separately identified through a risk group identification marker. These claims were collected from the FY2013 managed care encounter database for all service areas with exception of the three MRSA areas. During FY2013 the only managed care program operating in the MRSA was STAR which does not include the nursing facility risk group identification. The average adjustment factor across the other ten service areas has been applied to the three MRSA service areas.

## **Attachment 9**

### **Managed Care Efficiency Adjustment**

Our rating analysis includes an explicit assumption regarding the anticipated reduction in claims cost resulting from the implementation of managed care. In deriving the managed care efficiency factor, we relied upon experience from previous STAR+PLUS expansions. The underlying assumptions are a 22% reduction in unmanaged inpatient costs, a breakeven reduction on unmanaged non inpatient acute care costs and no reduction on nursing facility costs.

The 22% inpatient savings assumption was derived from historical experience with the expansion of STAR+PLUS across the state over the past decade. The non inpatient savings assumption was derived by solving for the managed care discount necessary to offset the increased administrative expense and risk margin associated with transitioning the nursing facility population to managed care. From Attachment 2, the statewide average non inpatient acute care cost is \$380.91 during our base period. Allocating \$8.67 of the administrative cost to non inpatient acute care the savings assumption is determined by solving the following equation:

$$\frac{\$380.91 = \$380.91 * (1-X) + \$8.67}{1.02}$$

Where X is the managed care savings assumption

The necessary breakeven managed care discount for non inpatient acute care is 4.3%.

As discussed in Attachment 8 a portion of the acute care data used in the rate development is currently managed under the STAR+PLUS program. It is assumed that there will be no further managed care savings on this population. In FY2013 approximately 65% of the acute care for nursing facility residents was paid on a fee-for-service basis. Applying this 65% to the managed care discounts discussed above results in the following savings assumptions which were applied in the rate development:

Acute Care (non-inpatient)	2.8%
Acute Care (inpatient)	14.3%
Nursing Facility	0.0%

No managed care savings are assumed for nursing facility claims because participating HMOs will be required to contract with all nursing facilities at or above the current Medicaid fee-for-service reimbursement levels. Any savings associated with nursing facility will be due to HMOs transitioning nursing facility residents out of a facility and into a community setting. With this transition these members will be moved into a different, lower cost risk group, STAR+PLUS HCBS.
