I. Introduction

Rudd and Wisdom, Inc. has developed premium rates for the period September 1, 2020 through May 31, 2021 (FY2021) for the Medical Transportation Program (MTP). MTP provides non-emergency medical transportation to Medicaid, Children with Special Health Care Needs (CSHCN) and Transportation for Indigent Cancer Patient (TICP) members who do not have a way to get to covered health care services. Effective June 1, 2021 non-emergency medical transportation services will be provided by the Medicaid managed care organizations. This report presents the rating methodology and assumptions used in developing the September 1, 2020 through May 31, 2021 premium rates for MTP.

The Health and Human Services Commission (HHSC) currently has two managed non-emergency transportation programs: (a) full-risk broker (FRB) contracts in the Dallas/Fort Worth and Houston areas; and (b) managed transportation organization (MTO) contracts in the remainder of the state. The two FRB contracts have been in place since March 16, 2012, and April 16, 2012. The MTO contracts have been effective in the remaining Texas regions since September 1, 2014. Effective November 12, 2015, members in MTO Region 4 (North Texas) were carved out of managed care and placed back into fee-for-service. The FY2021 premium rates presented in this document include all Texas regions except MTO Region 4.

Rudd and Wisdom has relied on the following data sources as provided by HHSC, MTOs and the FRBs.

- Monthly enrollment by risk group and county. This includes historical enrollment since September 2015 and a projection of future enrollment through August 2021. These projections were prepared by HHS System Forecasting staff.
- Claim lag reports for each FRB and MTO for the period September 2016 through February 2020. These reports were provided by the FRBs and MTOs and include monthly paid claims by month of service, service category and risk group.
- Financial Statistical Reports (FSR) for the MTOs and FRBs for FY2018, FY2019 and the first six months of FY2020. The FSR contains detailed information regarding monthly enrollment, revenue, incurred claims and administrative expenses, as reported by the vendors.
- Information from the MTOs and FRBs regarding recent reimbursement changes for demand response providers.
- Information from MTP regarding recent changes to Individual Transportation Participant mileage reimbursement.
- Information from MTP staff regarding program administrative expenses.

After accumulating all of the information to be used in the rate setting process, a comparison of the various sources of claims data was performed to check for consistency. We compared (i) the claim lag reports provided by the MTOs and FRBs and (ii) the claim amounts reported in the FSRs. These data sources are compared to ensure consistent results such that the data are considered interchangeable in aggregate. Although interchangeable in total, each data source has a unique role in the analysis. FSR data provides high level

summary information of claims data and administrative costs. In some cases, this information is available at the risk group level while for others it is only provided at an aggregated level. MTO and FRB summary reports provide HHSC-specified data points at a more granular level such as claim lag data by type of service and month of trip. The use of these multiple data sources allows for a dynamic, flexible rating model that is not constrained to the data limitation of a single source.

All data requested by the actuary was provided by HHSC and the participating MTOs and FRBs. Although the above data was reviewed for reasonableness, Rudd and Wisdom did not audit the data.

Based on the review of the data by HHSC and the participating MTOs and FRBs, we have concluded that all data sources are consistent, complete and accurate. It is our opinion that the data collected for the rate development is high quality and we have no concerns over the availability or applicability to the FY2021 rate development. The accumulation of data sources noted above have been assigned full credibility.

Given the history of managed care data available for the MTP program, the rate development is based exclusively on managed care data.

II. Overview of the Rate Setting Methodology

The actuarial model used to derive the September 1, 2020 through May 31, 2021 (FY2021) FRB and MTO premium rates relies primarily on historical FRB and MTO financial experience. The historical claims experience data was analyzed and estimates for the base period were developed. The base period for the FRBs and MTOs relied on historical financial experience for the period January 1, 2019 through December 31, 2019 (CY2019). Estimates of the base period include an estimate of incurred but not reported (IBNR) claims based on claims paid through February 29, 2020 and represents 0.5% of total incurred claims for the base period. These incurred claims estimates were then projected forward to FY2021 using assumed trend rates and other adjustment factors. These adjustment factors are described in more detail in Section III. We added a reasonable provision for administrative expenses and risk margin in order to project the total FY2021 cost. This analysis was conducted for all Texas regions except for MTO Region 4.

Capitation rates were developed for the following Texas regions:

- MTO Region 1 – Panhandle
- MTO Region 2 – West Texas
- MTO Region 3 – Northwest Central
- MTO Region 5 – East Texas
- MTO Region 6 – Southwest Texas
- MTO Region 7 – Central Texas
- MTO Region 8 – South Central Texas
- MTO Region 9 – Southeast Texas
- MTO Region 10 – South Texas
- MTO Region 11 – Northeast Central
- FRB SDA 1 – Dallas/Fort Worth
- FRB SDA 2 – Houston

Capitation rates were determined for the following risk groups:

- Medicaid Children – Rural Counties
- Medicaid Children – Urban Counties
- Medicaid Adults – Rural Counties
- Medicaid Adults – Urban Counties
- Children with Special Health Care Needs (CSHCN)
- Transportation for Indigent Cancer Patient (TICP) – Only applies to Region 10

The non-emergency transportation services used in the analysis include the following:

- Demand Response Transportation
- Individual Transportation Participant (ITP)
- Mass Transit Ticket
- Meals and Lodging
- Advance Funds
- Out-of-State Travel

- Attendant Services
- Commercial Airline Transportation Services
- Nonemergency Ambulance Transportation

III. Adjustment Factors

This section contains a description of the adjustment factors used in the FY2021 FRB and MTO rate setting process.

Trend Factors

The rating methodology uses assumed trend factors to adjust the base period claims cost to the projection period. The trend factors used in this analysis are a combination of utilization and inflation components. The trend factors were developed using a combination of i) the actual trend experience under the program and ii) the industry trend from the Consumer Price Index published by the Bureau of Labor Statistics for transportation services. The annual trend assumption of 3.42% was used in the rating analysis to project historical experience forward to the rating period.

Attachment 2 presents a summary of the derivation of the annual trend assumption.

Individual Transportation Participant Reimbursement Change

Effective January 1, 2020, reimbursement for Individual Transportation Participant (ITP) service decreased from \$0.58 per mile to \$0.575 per mile. The base period claims cost for ITP service has been adjusted to reflect this change.

Seasonality Adjustment

The FY2021 FRB and MTO rates will be effective for the nine-month period September 1, 2020 through May 31, 2021. A seasonality adjustment was applied to reflect the cost difference between the months included in the base period and the rating period.

COVID-19

No adjustments to the rate development assumptions have been made as a result of the COVID-19 pandemic and its potential impact on utilization and cost. At the time the FY2021 rates were calculated there was no credible information on the impact to the specific Texas Medicaid programs and populations. While the preliminary insight is that utilization may be depressed for certain services and populations during parts of the remainder of FY2020, it is expected that there will be a rebound in utilization as pent up demand shifts services that were forgone during FY2020 into FY2021. At this time the impact cannot be estimated with any degree of certainty and has been excluded from these calculations.

In order to mitigate the risk to both HHSC and the MTOs resulting from COVID-19, HHSC and its actuaries will collect additional information from the participating MTOs during the summer and fall of 2020 to determine if a retroactive adjustment is necessary to properly account for COVID-19 related impacts to program expenditures.

IV. Administrative Fees, Taxes and Risk Margin

The rating methodology includes an explicit provision intended to provide for all administrative-related services performed by the vendors. The formula used for administrative expenses is \$0.175 per member per month (pmpm) plus 22.0% of gross premium. The administrative fee provision is limited to the minimum of i) the formula above or ii) 115% of the average administrative expense pmpm reported in each of the MTO and FRB's past three FSRs.

The data used in developing the administrative expense assumption are the detailed administrative costs reported by the transportation organization in their audited financial statistical reports (FSRs) for the past three fiscal years. These reports provide a detailed breakdown of monthly administrative expenses by category including salaries, technology, equipment, rent, call center and other expenses. These reports are provided quarterly and audited annually by an external auditor.

The table below summarizes the reported per capita administrative expenses for the past three fiscal years for MTP.

| | Average |
|------|---------|
| FY17 | 0.86 |
| FY18 | 0.81 |
| FY19 | 0.81 |

Based on the administrative formula included in the rate development the average administrative expense included in the capitation rates is \$0.89 pmpm which is in line with the historical averages. The fixed and variable components of the administrative cost assumption are not intended to account for different administrative cost categories. The combined administrative assumption is intended to be a reasonable amount to cover all administrative costs. This formula is reviewed annually to ensure consistency with the reported administrative costs.

No provision for premium, maintenance or Health Insurance Provider Fee taxes is included in the rate calculation as non-emergency medical transportation services are exempt from such taxes. The rates do include a risk margin equal to 1.50% of gross premiums.

VI. Actuarial Certification of FY2021 FRB and MTO Premium Rates

I, Khiem D. Ngo, am a principal with the firm Rudd and Wisdom, Inc., Consulting Actuaries (Rudd and Wisdom). I am a Fellow of the Society of Actuaries and a member of the American Academy of Actuaries. I meet the Academy's qualification standards for rendering this opinion.

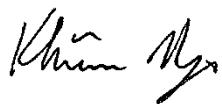

Rudd and Wisdom has been retained by the Texas Health and Human Services Commission (HHSC) to develop the capitation rates applicable to the Texas Medical Transportation Program's Full Risk Broker (FRB) and Medical Transportation Organization (MTO) contracts for the rating period September 1, 2020 through May 31, 2021 (FY2021) and to provide the actuarial certification required under Centers for Medicare and Medicaid Services (CMS) requirements 42 CFR 438.4.

I certify that the FY2021 FRB and MTO premium rates developed by HHSC and Rudd and Wisdom satisfy the following:

- (a) The premium rates have been developed in accordance with generally accepted actuarial principles and practices;
- (b) The premium rates are appropriate for the populations and services covered under the managed care contract; and
- (c) The premium rates are actuarially sound as defined in the regulations.

We have relied on historical experience data and program information provided to us by HHSC. We have reviewed the data for reasonableness but have not audited the data.

Please note that actual health plan contractor experience will differ from these projections. Rudd and Wisdom has developed these rates on behalf of the State to demonstrate compliance with the CMS requirements under 42 CFR 438.3(c), 438.3(e), 438.4, 438.5, 438.6 and 438.7. Any FRB or MTO contracting with the State should analyze its own projected premium needs before deciding whether to contract with the State.

Summary of FY2021 MTP and FRB Rating Analysis

The following exhibits present a summary of the experience analysis performed for each of the FRB and MTO regions.

Below is a brief description of each of the exhibits contained in the attachment. The exhibits present the derivation of the FY2021 FRB and MTO premium rates for the following regions:

- Exhibit A – MTO Region 1 – Panhandle
- Exhibit B – MTO Region 2 – West Texas
- Exhibit C – MTO Region 3 – Northwest Central
- Exhibit D – MTO Region 5 – East Texas
- Exhibit E – MTO Region 6 – Southwest Texas
- Exhibit F – MTO Region 7 – Central Texas
- Exhibit G – MTO Region 8 – South Central Texas
- Exhibit H – MTO Region 9 – Southeast Texas
- Exhibit I – MTO Region 10 – South Texas
- Exhibit J – MTO Region 11 – Northeast Central
- Exhibit K – FRB SDA 1 – Dallas/Fort Worth
- Exhibit L – FRB SDA 2 – Houston

These exhibits show the calculation of the FY2021 premium rates for each region. The top portion of the exhibit shows summary base period enrollment and claims experience by service category. These estimates were then projected forward to FY2021 using assumed trend rates and other adjustment factors. These adjustment factors are described in more detail in Section III.

The formula used for administrative expenses is \$0.175 per member per month (pmpm) plus 22.0% of gross premium. The administrative fee provision is limited to the minimum of i) the formula above or ii) 115% of the average administrative expense PMPM reported in each of the MTO and FRB's FY2018, FY2019, and 2nd quarter FY2020 FSRs. We also added a risk margin equal to 1.50% of gross premiums to protect against adverse claim experience.

At the bottom of the exhibit is a summary of the projected FY2021 cost based on these assumptions.

Trend Analysis

The rating methodology uses assumed trend factors to adjust the base period claims cost to the projection period. The trend factors used in this analysis are a combination of utilization and inflation components. The trend factors were developed using a combination of i) the actual trend experience under the program and ii) the industry trend from the Consumer Price Index published by the Bureau of Labor Statistics for transportation services.

The experience trend analysis included a review of transportation organization claims experience data through February 2020. Based on this information, estimates of monthly incurred claims were made through December 2019. The claims cost and trend experience were reviewed separately by region and risk group. The region trends were then combined into a statewide average using a weighted average formula with estimated incurred claims as the weights. All historical trends have been calculated as the average cost per member per month during a specified time period (monthly, quarterly or annually) compared to the same time period from the prior year. For example, the CY2019 trend has been calculated as the change in average cost per member per month during the period January 1, 2019 through December 31, 2019 (CY2019) compared to the average cost per member per month during the period January 1, 2018 through December 31, 2018 (CY2018). The experience trends for all time periods were adjusted to remove the impact of the various provider reimbursement changes and other revisions that have impacted the cost of the program. The trend analysis only includes demand response service and excludes experience for MTO Regions 1 and 10 resulting from changes in transportation provider effective September 1, 2017. The selected experience trend was determined using a straight average of the CY2017, CY2018 and CY2019 statewide trend. This analysis was used to select an experience annual trend rate assumption of 3.6%. Attachment 2 Exhibit C presents a summary of the derivation of the annual trend assumption.

The industry annual trend assumption was selected by the actuary based on a study of the transportation Consumer Price Index (CPI) and the actuary's judgment regarding future cost increases. The inflation trend assumption of 1.7% was selected by taking the average of the monthly year-over-year CPI trend published by the Bureau of Labor Statistics from January 2010 through December 2019. The utilization trend assumption of 1.5% was selected based on the actuary's judgment regarding future utilization increases. This analysis was used to select an industry annual trend rate assumption of 3.2%. Attachment 2 Exhibit B presents a summary of the derivation of the annual trend assumption.

The selected annual trend assumption was determined using a straight average of the experience annual trend assumption and the industry annual trend assumption. This analysis was used to select an annual trend rate assumption of 3.42%. Attachment 2 Exhibit A presents a summary of the derivation of the annual trend assumption.
